In order to fulfil the objectives defined in the Strategic Plan for Educational and Scientific, Research, Development and Innovation, Artistic and Other Creative Activities of the College of Polytechnics Jihlava, the following quality policy has been declared for the 2016-2020 period.

The purpose of the quality management system at the College of Polytechnics Jihlava is to create conditions for continuous improvement and increase of the quality of the College in accordance with its mission and strategic plan, which supports the development of an individual and their preparation for life in an increasingly complex society, and to develop the expertise, trust, loyalty and involvement of academics and other College employees, students, graduates, employers, representatives of state and local government, and the general public who contribute to the development of the quality of the College.

The quality policy at the College of Polytechnics Jihlava is based on the shared vision and values of the College, namely on its focus on applied knowledge, the mission of the College being to provide professionally diverse study programmes focused mainly on the needs of the regional labour market, foster intensive cooperation with the application sphere, appropriate creative activities and applied research, provide a wide variety of lifelong learning, and enhance cultural and general educational development of the region.

The policy creates a favourable environment for strong motivation of workers to achieve the quality objectives set, stresses elements of leading, efficient decision-making, and system approach of the management with the purpose to increase the efficiency and performance of the College, and creates a mutually beneficial relationship between the College and its partners.

In quality management, the College of Polytechnics Jihlava applies these key principles:

- Responsibility in the approach to teaching, scientific, and organisational tasks;
- Study programmes relevance;
- Competence of all College workers;
- Communication and partnership between individuals, programmes, departments and other institutions;
- Flexibility and personal commitment in response to both changing conditions and continual improvement of the quality assurance system and processes.

The principles of the quality management system at the College of Polytechnics Jihlava

1. The quality policy is translated into practice through the quality management system, which is coordinated by the Academic Council of the College of Polytechnics Jihlava.
2. The quality management system is part of the strategic management of the College of Polytechnics Jihlava and is implemented at all levels of the College management.
3. Quality objectives are set and fulfilled by defining quality requirements in all areas of activity of the College of Polytechnics Jihlava and are continuously monitored and evaluated.
4. All organisational units of the College of Polytechnics Jihlava respect and fulfil the quality policy and quality objectives and all workers of the College participate in its implementation.
5. Quality assurance and assessment involves all stakeholders, academics and other workers, students, graduates, employers, state and local government representatives, and the general public.
6. Quality assessment is based on objective, factual, professional and ethical evaluation of verified data.
7. The results of the quality assessment are expertly evaluated. If necessary, corrective measures are taken and re-evaluated after a certain period of time.
